Dear

Re: Waterways House- Electric Vehicular / Security Gates

Many of you will be aware that Hillingdon Council previously refused planning permission for the installation of perimeter gates at Waterways House; resulting in the property being unavoidably built without this amenity.

In light of the unprecedented levels of vandalism of the property, and other anti-social behaviour; we have asked that the decision is re-considered to improve the security for all residents. To this end we are preparing to make a (new) formal planning application and a surveyor has been duly appointed.

We now write to all residents to ask that they consider supporting the application and enclose herewith a form for your submission. We would ask that you document to the planning officer any reason that you feel is relevant to their consideration of the installation. We would expect that you would document any instances where you have seen intruders in the car-park or building, or have witnessed or been a victim of crime.

We will of course be making our own lengthy supporting statement, as will the Metropolitan police (as evidenced by all of the diligent reporting by the residents and resultant crime reference numbers – thank-you!).

Please complete and return the form as directed thereon within 7 days of receipt. We will be submitting this with the application – therefore the form is not to be submitted directly to Hillingdon Council. The process is likely to take many months to complete, however we are hopeful of a successful outcome this time around.

We thank all residents for their support of the proposed project.

Yours sincerely

Beverley Leonard
